Work Experience

Freelance Web Developer & Automation Specialist

Jul 2024 – Present

Front-End Development, Workflow Automation, Client Solutions

Remote

- Designed and deployed responsive websites using React, HTML, CSS, and JavaScript for SMEs and personal brands.
- Integrated third-party APIs and automation tools (n8n, teable) to streamline client operations and reduce manual tasks.
- Customized WordPress sites with optimized UX/UI, SEO best practices, and performance tuning.
- Developed reusable components and implemented client-requested features in agile, iterative cycles.
- Provided ongoing technical support, bug fixes, and performance improvements for live applications.
- Delivered documentation and walkthroughs to help clients manage and maintain their platforms independently.

Access Bank Plc

Nov 2022 - Jul 2024

Application Developer (ProcessMaker)

Lagos, Nigeria Hybrid

- Developed 10+ enterprise-grade workflows automating internal processes for over 500 users, reducing manual operations and approval times by 40%.
- Designed and deployed scalable process forms, scripts, and triggers in ProcessMaker BPM, enhancing task automation and operational accuracy.
- Integrated ProcessMaker with internal systems and databases using REST APIs, streamlining interdepartmental workflows and data flow.
- Continuously optimized workflows for speed, usability, and reliability, increasing overall process adoption across departments.
- Maintained detailed technical documentation and user guides, enabling faster troubleshooting and onboarding of new developers.

Application Support

- Reduced application downtime by 30% through proactive support, incident management, and root cause analysis.
- Delivered first- and second-line technical support across phone, email, and chat, consistently meeting service level agreements (SLAs).
- Logged, tracked, and escalated technical issues using ServiceDesk tools, ensuring timely resolution aligned with ITIL best practices.
- Collaborated with stakeholders to identify recurring issues, implementing workflow improvements and knowledge base updates.
- Conducted end-user training and system onboarding sessions, improving adoption rates and decreasing repeat support tickets.
- Supported agile delivery cycles; contributed to sprint planning, daily standups, and retrospectives as a certified Scrum Master.

- Enhanced web applications using HTML, CSS, JavaScript, MySQL, and PHP, improving functionality and user satisfaction
- Designed websites on WordPress that increased user engagement by improving navigation and accessibility
- Collaborated on tech projects, ensuring timely completion and meeting project goals through effective team management
- Developed websites with interactive features, conducted navigation testing, and created landing pages.
- Expanded technical knowledge through exposure to diverse tech industry practices, leading to improved problem-solving skills
